

The new
Development Centre

New Development Centre for Wilmington Enterprise College, Dartford 21/10/08

Lee Evans Partnership has just completed a new Development Centre for Wilmington Enterprise College, Dartford, a specialist Business and Enterprise College. The new building which includes a new sixth form centre, special needs facilities and staff room is designed to support the development of members of the College community and was formally opened by Sir Robert Worcester KBE DL, Chancellor of the University of Kent on 2nd September 2008.

The Development Centre, a 2-storey building simple in form, provides a link between the school's new Jubilee Building and an existing teaching block. As part of the works, this existing teaching block has also been substantially upgraded and visually improved with high grade rigid insulation covered with attractive vertical larch cladding.
