

**West Faversham
Community Centre**

Lee Evans Partnership's scheme for West Faversham Community Centre now under construction 24.06.11

A project to rebuild the West Faversham Community Centre is now on site.

Lee Evans Partnership's scheme will provide the Bysing Wood area of Faversham with much needed services and facilities which include a large sub divisible main hall which can be used as a sports court and drama space. Including fully retractable seating the hall is capable of accommodating around a 300 person audience.

The community centre will provide a children's nursery, youth club and community rooms. The project is due to be constructed over 2-phases with completion in the Spring 2012.
