

Phase 1 The Creative School is now complete

Community College Whitstable

The 3 phase project is due to complete in January 2011 and Phase 1 The Creative School is now finished. It forms the main visitor entrance and its double height is designed to exhibit students' work and offers easy access to the performance hall for community use.

The design was short listed for The Excellence in BSF Awards. High quality new accommodation, designed for new ways of learning, replaces worn-out unsuitable environments and retained older buildings will be fully refurbished, remodelled and extended. The innovative internal and external areas are intended to inspire creativity and learning. Teaching spaces will incorporate features which support 21st century pedagogy and make best use of innovative furniture and equipment to transform the learning environment.

The elements of new build will be integrated in a holistic approach to create a cohesive campus centred on a dramatic courtyard that provides a focus for the whole school whilst maximising the fantastic views over Whitstable and Thames Estuary.
